

# MAUI provides user-friendly administration of your REDCOM system

- ▶ Simplifies OA&M of your REDCOM switch
- ▶ Intuitive GUI provides an interactive graphic view of your system
- ▶ Works with your existing PC
- ▶ Enhances maintenance and productivity of your system

## SIMPLIFY THE SET-UP OF YOUR REDCOM SWITCH

REDCOM's Maintenance and Administration User Interface (MAUI) helps you set up your REDCOM switch simply and easily.

MAUI gives you a graphic overview of your entire telecommunications system. Using a specialized "configuration wizard" you can quickly and easily add new lines and make updates to your system. Offering a user-friendly, feature rich design, MAUI helps you easily navigate through the program with intuitive screens and commands. Everything you need to know about your system is just a mouse-click away.

## MAUI HELPS YOU MAXIMIZE PRODUCTIVITY

MAUI's automated "system performance check" function looks for problems and works to correct them—helping you save time and effort in system maintenance.

## A FULL PORTFOLIO OF FEATURES

- **Network Overview:** Provides an interactive graphic view of your entire system
- **Configuration Wizards:** built-in tools that simplify frequently performed switch maintenance tasks
- **Call Translation Management:** Allows you to quickly and easily navigate through Routes, Office Codes, and Dial Code Tables
- **Line Circuit Management:** Conveniently summarizes the enabled features of assigned line circuits, and lists all unassigned line circuits in your system
- **Translator Trace Maintenance:** Provides internal system views that allow you to check system performance.
- **Trunk Circuit Management:** Provides a color coded display that shows the current status of groups and spans
- **Visual Queues:** Assists in troubleshooting with an easy to identify group of color-coded system messages
- **Context Sensitive Help:** Pop-up boxes that deliver specific "help text" regardless of the screen in use.
